

## **Pre-Conference Speaker: Thursday 18<sup>th</sup> Sept.: 14 - 18 p.m.**

### Joseph Shafer, D.C., DIBAK

AK made simple: differential diagnosis of mechanical disc vs. discitis – the neural sheath vs. vertebral body inflammation and piriformis syndrome.

## **Speakers PAK-Antwerp conference: Friday 19 - Sunday 21<sup>st</sup> Sept.**

Michael D. Allen, D.C., NMD, DIBAK : The Heart-Brain Connection - The Efferent Autonomic Drive This presentation will discuss the functional neurological mechanisms of spinal cord performance.

Jan Berx, D.O.: Treatment of Babies: Birth processes and consequences will be discussed + solution using new Neurostructural Integration Techniques.

Agné Cervo Peres D.D.S.: TMJ Exercise on inflammatory processes, internal alteration of the articular disk, articular hypo- or hypermobility, muscular dysfunction or limitation of the amplitude of movement.

Scott Cuthbert, D.C.: A report on AK papers. Research review & beyond. Two separate linked presentations together with Donald Mc Dowall, D.C., DIBAK

### Hans Garten, M.D., DIBAK, DACNB, D.O.

Tests and Procedures for Disc Problems, Imbrication and Spondylosis. Protocols using Professional Applied Kinesiology and Functional Neurology will be presented.

Tracy S. Gates, D.O., DIBAK: New Approaches in AK for the treatment of chronic asthma.

Wolfgang Gerz, M.D., DIBAK: The Hypertonic Muscle. Basics and Consequences for AK

Keith Keen, D.C., D.O., DIBAK: A treatment procedure developed by Dr John Longbottom is presented on scars and tissue damage. Some scars that are often missed, yet may have a very deleterious effect on health and wellbeing.

### Simon King B.App.Sc.(Chiro), DIBAK

Muscle Activation is a new technique developed from sound proprioceptive principles which quickly finds muscle inhibition and allows accurate investigation of the cause. This presentation will cover muscle reflexes, facilitation, inhibition and summation. Information you can use to speed up any Applied Kinesiology examination.

Werner Klöpfer, M.D., DIBAK: How Applied Kinesiology can help on the problem of chronic borreliosis.

David W. Leaf, D.C., DIBAK: Applied Kinesiology on the upper extremity

### Roseli Luppino Peres, D.D.S.

Odontology and AK: The interconnection of the Trigeminal System with the musculature and the three first cervical segments: why we can't observe cervical alteration without occlusion problems and vice-versa. Occlusion problems and organic functioning.

### Donald Mc Dowall, D.C., DIBAK

A report on AK papers. Research review & beyond. Two separate linked presentations.

### Eric Pierotti, D.C., DIBAK

Symphysis Pubis Diastasis - Beyond Category II

Erik Richter, N.D.: Relations between quality of skin, arteries and bones. Ways to measure skin quality and collagen distribution. Prediction of risks for osteoporoses and cardiovascular health.

Chris Astill-Smith D.O., N.D., DIBAK: Osteoarthritis - a holistic approach

### Ljudmila Vasiljeva, Prof. Neurology.

Ways to higher effectiveness of AK Treatment and prevention of it's possible complications.

Gerard Weiss, M.D.: A special case: Cancer-Remission under AK-guided treatment.

### Savely Yurkovsky, M.D.

Field Control Therapy – FCT<sup>®</sup> – a comprehensive model of health and disease.
